## 10 Years SuSanA Getting ready for the Agenda 2030

sustainable  
sanitation  
alliance

India Chapter

**Arne Panesar**  
**SuSanA secretariat held by GIZ**  
**Vandana Nath, India Sanitation Coalition**  
**18 February 2017**  
**Chennai, India**

# We have come a long way – SuSanA turns 10!

- SuSanA is an open network
- Links on the ground experiences with an engaged community
- Aims at promoting innovation and best practices
- SuSanA currently has 8000 individual members & around 300 partner organisations

# SuSanA worldwide – SuSanA members

We are a  
global  
community!

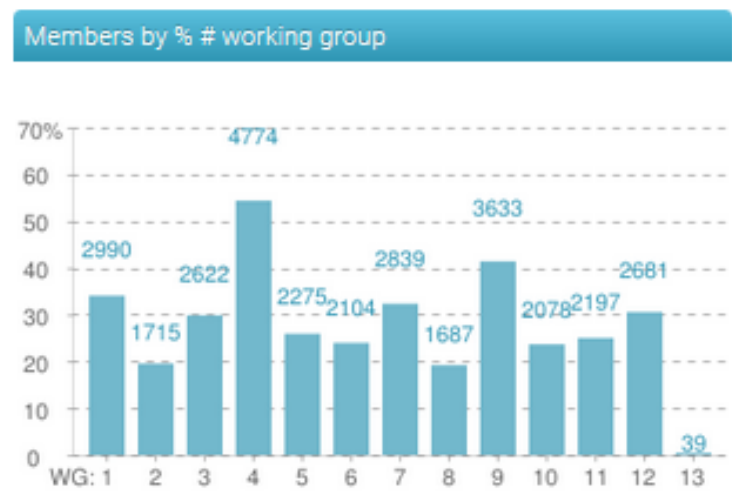

... with:

More than  
1000 Indian  
members  
&  
More than 100  
organisations  
active in India

# SuSanA Working Groups

1. Capacity development **X**
2. Market development **FSM**
3. Renewable energies and climate change
4. Sanitation systems, technology, hygiene and health **X**
5. Food security and productive sanitation systems
6. Cities **FSM** → SFDs (...)
7. Community, rural and schools **X** (with gender and social aspects)
8. Emergency and reconstruction situations
9. Public awareness, Advocacy and Civil Society Engagement
10. Operation and maintenance **FSM**
11. Groundwater protection
12. WASH and Nutrition
13. Behaviour Change

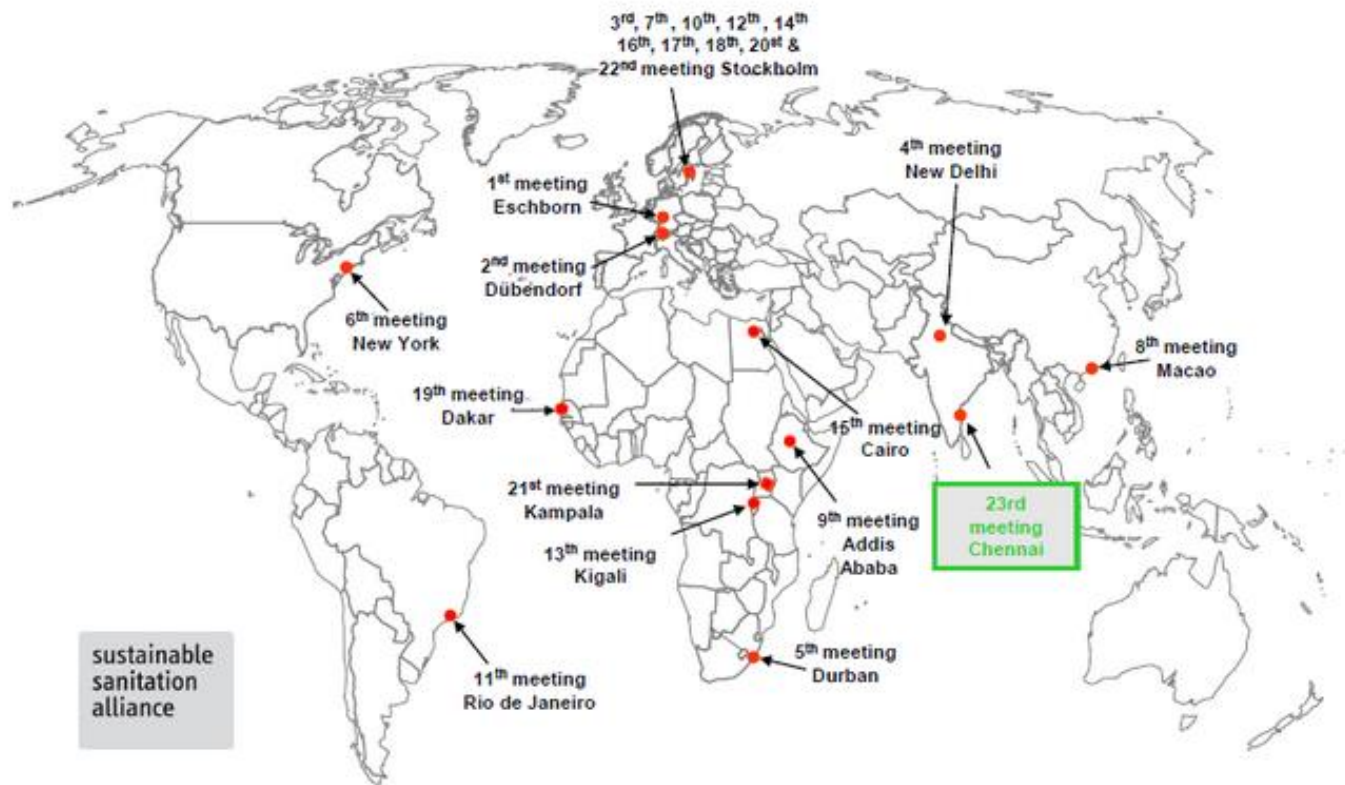

## Products, outputs, portal-sections

- Case studies (96)
  - Working group factsheets (14)
  - Library (2155), project DB (280),
  - Videos (< 250), photo database (< 10 000)
  - Thematic Online Discussions
  - Webinars
  - Key publications
- SuSanA website
    - Partner profiles
    - Events calendar
  - SuSanA Forum
  - SFD-Portal
  - FSM4-digital home

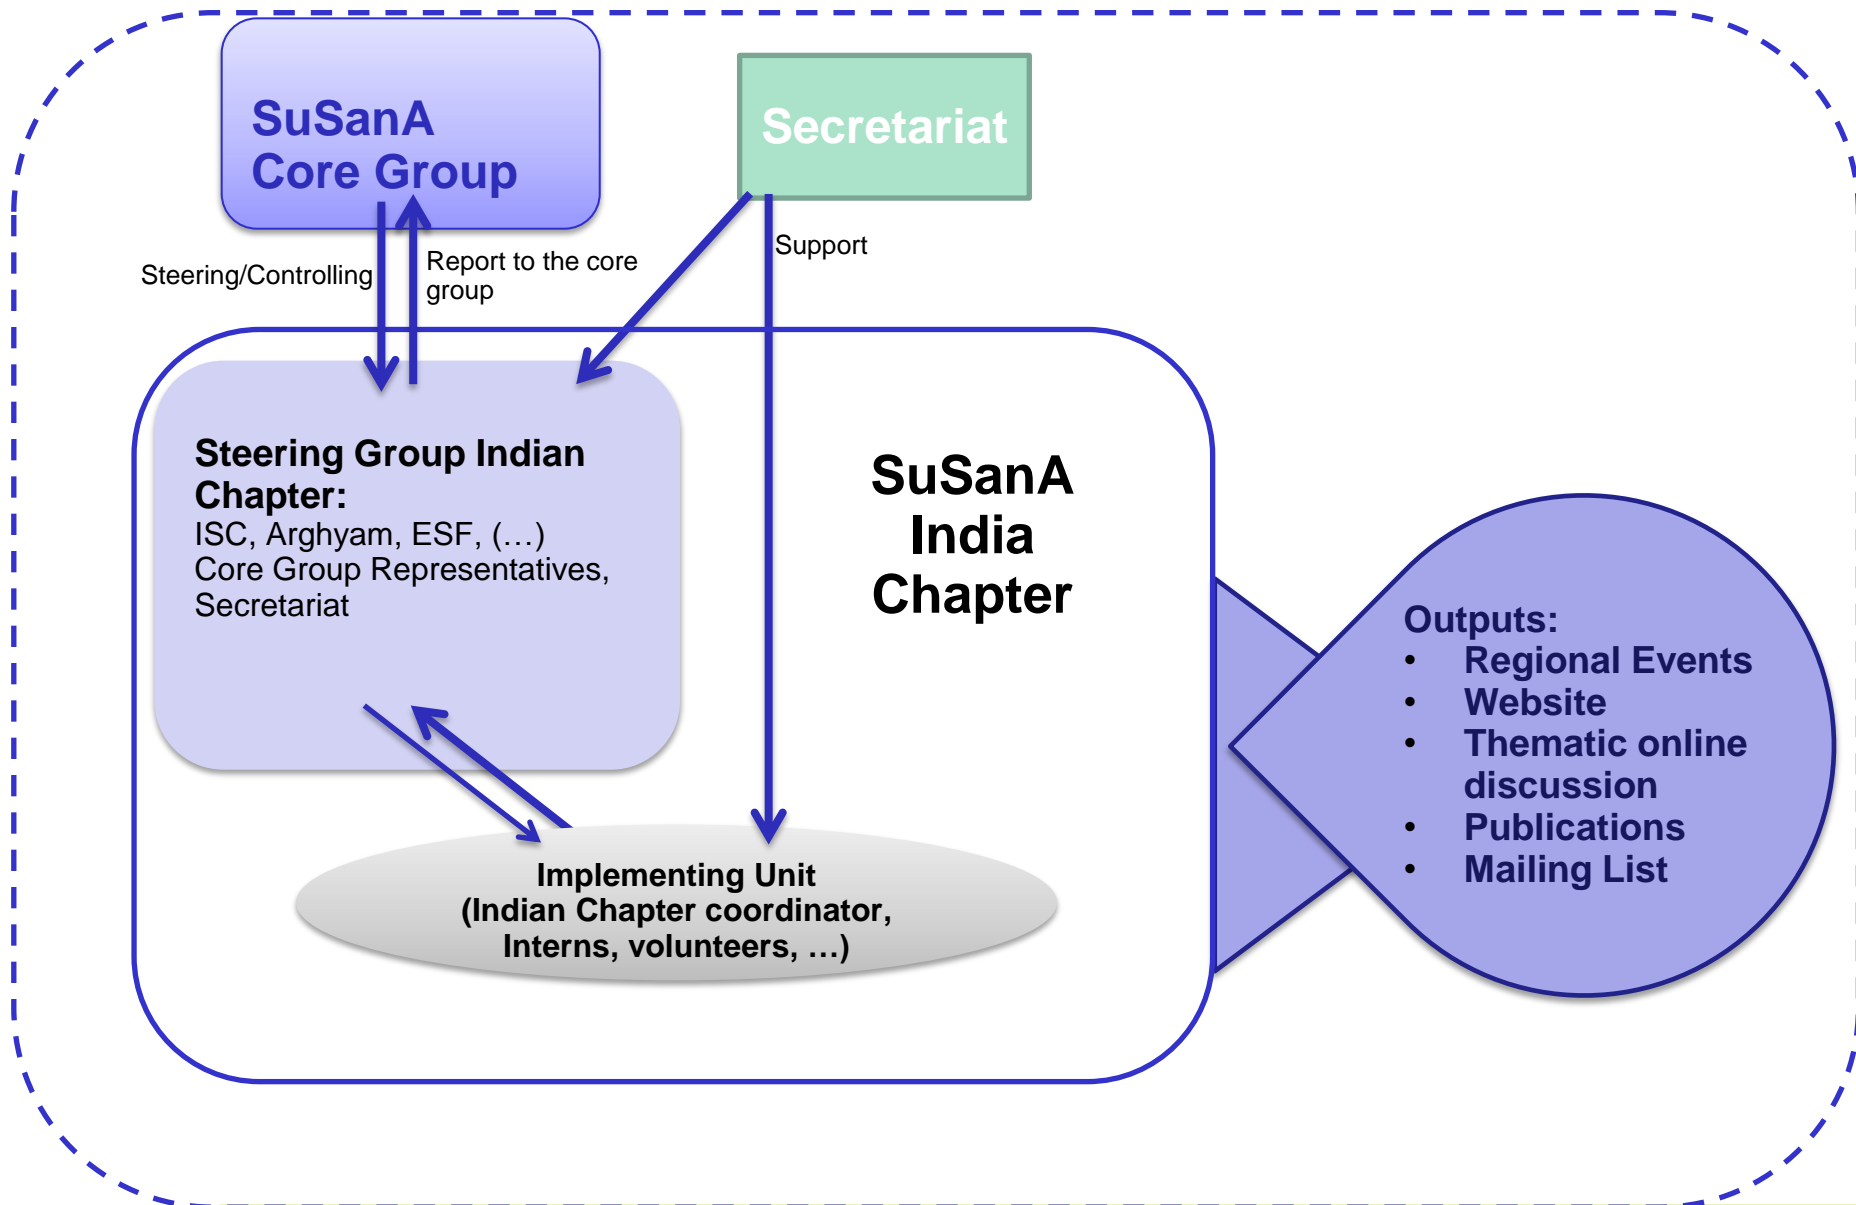

## SuSanA Meetings

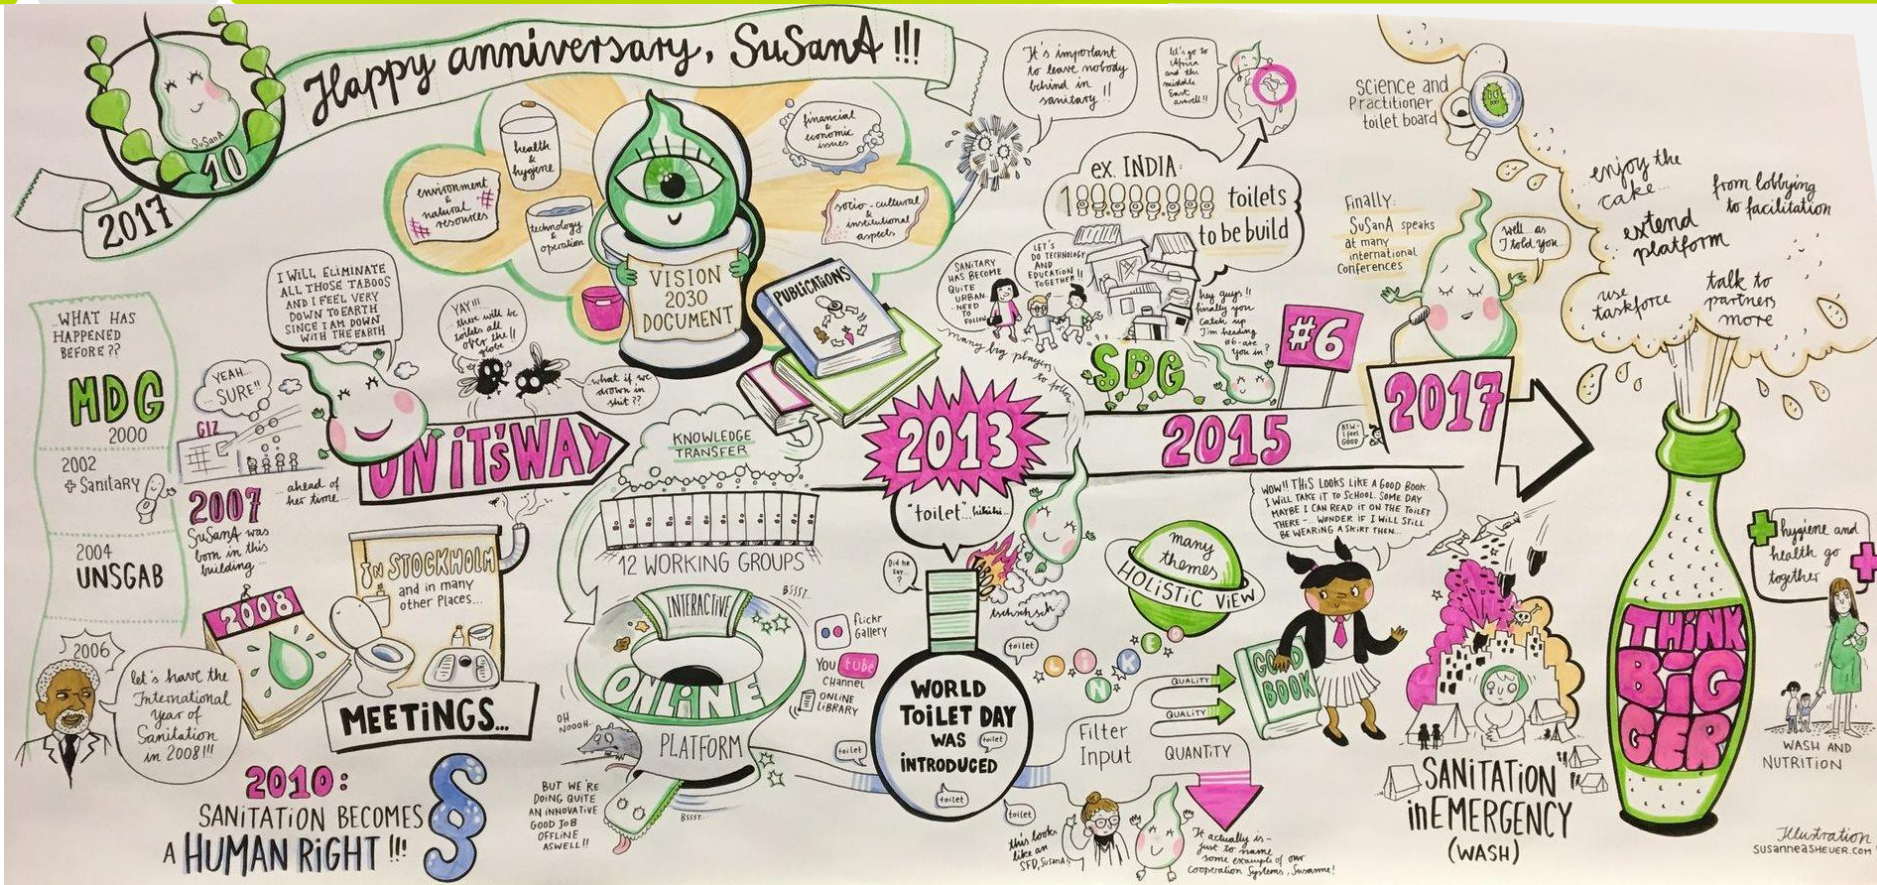

# SuSanA - India Chapter

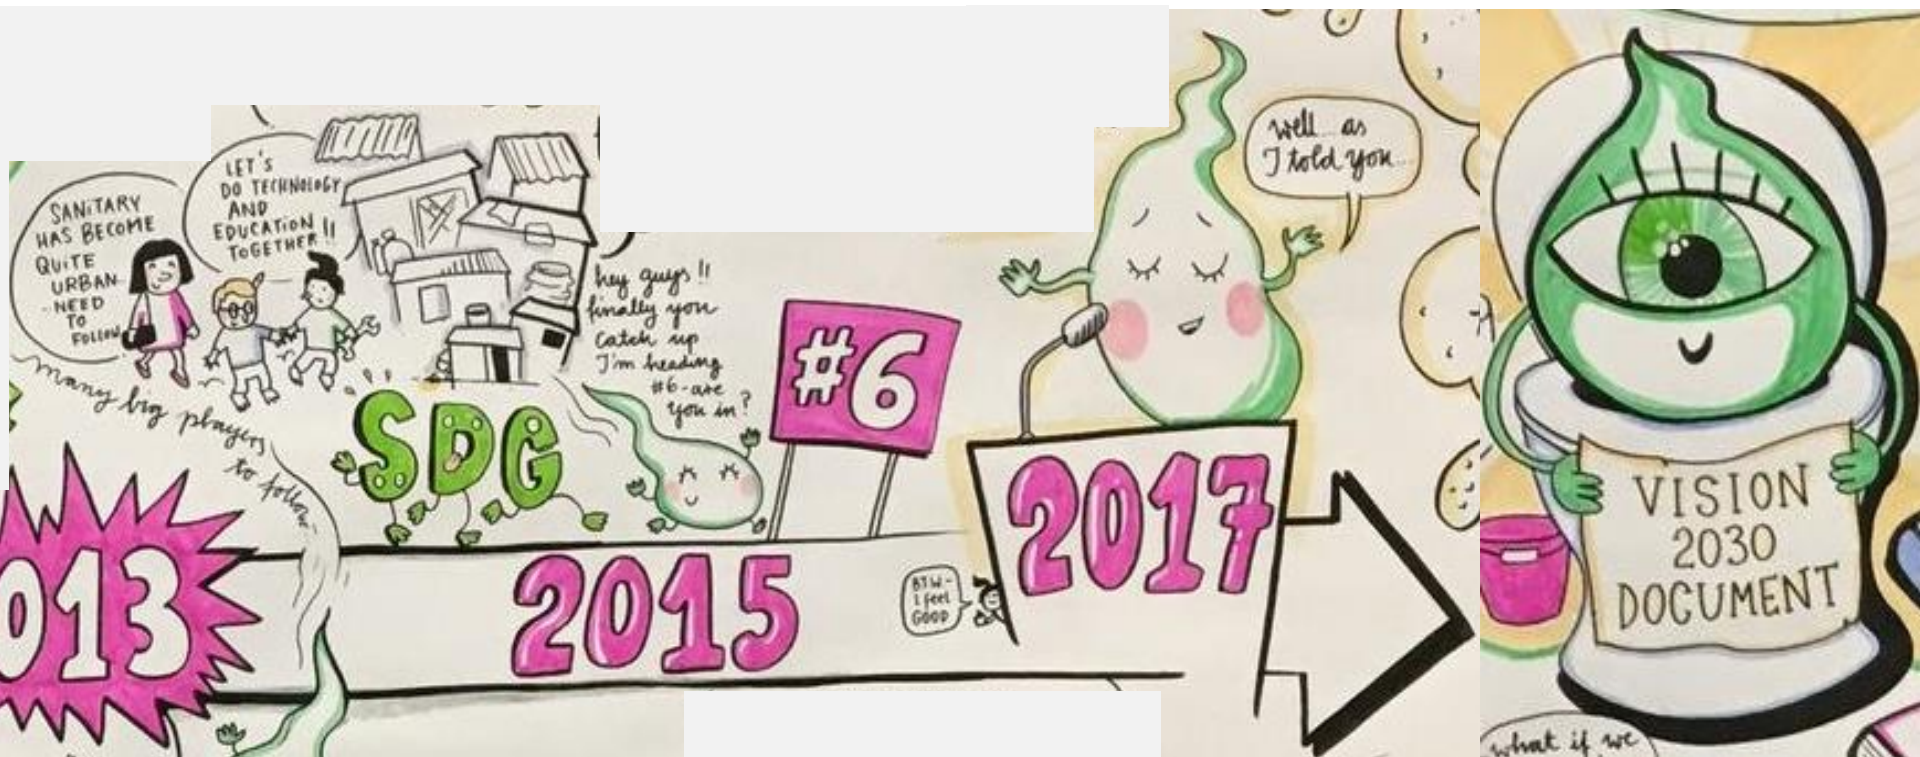

# We are getting ready for the Agenda 2030

# A revised SuSanA Vision Document

# From the MDGs to the SDGs – main differences between the MDGs and the SDGs related to Sanitation

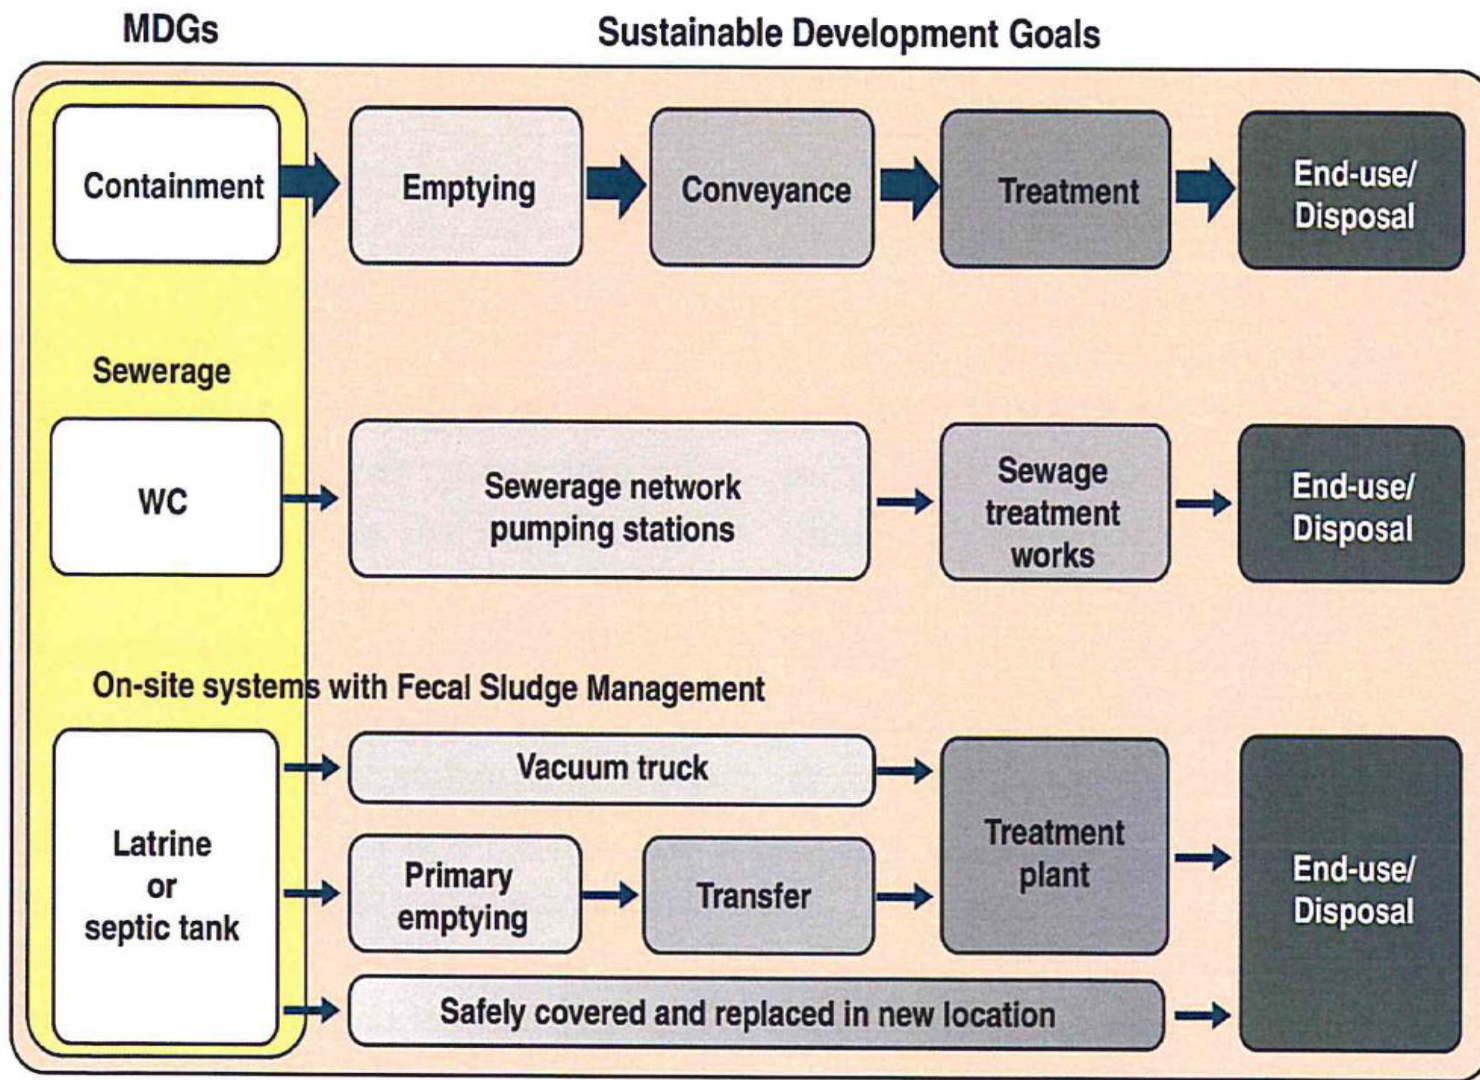

## MDGs

## SDGs

THE GLOBAL GOALS  
For Sustainable Development

# What does this mean for SuSanA ?

## New opportunities

- The many linkages between sanitation and targets across all SDGs offer new opportunities for SuSanA to reach out to and cooperate with other sectors

## Sanitation is interlinked with and contributing to all the targets of SDG 6

- Sustainable sanitation is crucial to achieve universal access to safe drinking, by **protecting and conserving water resources**

- Sustainable sanitation is a **foundation for adequate and equitable access**, also **addressing hygiene and gender & equity dimensions**

- Enabling **adequate treatment and increasing recycling and safe reuse of wastewater is part of a sustainable sanitation system**

- Sustainable sanitation contributes to overall water-use efficiency and reduction of water scarcity

- Sustainable sanitation systems that aim at conserving and recycling water are part of integrated water resources management

- **Prevention of pollution through sustainable sanitation is crucial for maintaining the integrity of aquatic ecosystems**

## What does this mean for SuSanA ?

### Good news: “SDGs are catching up with SuSanA”

- SuSanA’s sustainability criteria are very much in keeping with the underlying philosophy of the new 2030 Agenda and the SDGs

### Continuing challenges for SuSanA

- Lobbying role will be less important in favor of a more facilitating role (e.g. information exchange platform, developing appropriate tools, capacity building activities, etc.)
- SuSanA will continue to highlight the need for a system’s approach and looking at the entire service chain

### New challenges for SuSanA

- Responding to the call to “leave no one behind”: providing more focus on the hardest to reach and most vulnerable
- Responding to “universality”: still focusing on the low and low-to-middle income countries but be aware of developments in higher income countries and use them as showcase alternatives to conventional wastewater systems
- Improved cooperation between humanitarian and development actors: emergency interventions need to take into account sustainability issues right from the start
- Increased need for technical assistance in developing methodologies and designing monitoring structures at country-level

THE GLOBAL GOALS  
For Sustainable Development

## How to achieve the objectives ?

- Continuing to serve as a **knowledge management and exchange platform**
- Mainly operating through its **working groups and the SuSanA Platform** (discussion forum, webinars, library, project database, SuSanA's wiki-type pages, etc.)
- Face-to-face meetings
- The organisational structure, the thematic orientation of the working groups, and the existing fact sheets will be reviewed and adapted, with particular regard to meeting the (transversal) challenges of:
  - “leaving no one behind”;
  - grasping the new opportunities to reach out to, influence and cooperate with other sectors;
  - Improving cooperation between humanitarian and development actors

- **We invite everybody to add your vision to SuSanA's revised Vision Document !**
